I am a software engineer with knowledge of several programming languages like C, Java, Python, JavaScript, and frameworks and technologies. Examples of such technologies include Node.js, React, and Next.js. I'm passionate about working and growing with a team and maintaining good communication and leadership skills. My technical knowledge consists of a commitment to lifelong learning and development and my capacity to create a corroborative and cooperative work environment.

Skills

Web Development

- **Front-end:** React | Javascript | JSP | Bootstrap | MDBBootstrap | CSS | HTML
- **Back-end:** Node.js | Express.js | Jakarta Servlet
- **Database:** MySQL | MongoDB | Redis

Desktop Application

- Java Swing

Graphics Designing

- **Adobe:** Photoshop | Illustrator | XD

Other:

- Excellent Communication
- Agile Methodologies
- Problem-solving and Critical Thinking

Experience

Bonda E-commerce web application:

Holberton portfolio project, Mar 5, 2023 - Mar 31, 2023,

Bonda is a MERN web application project developed for selling and buying second-hand clothes. While working on this project, I understand that having a collaborative team in the developing process can significantly accelerate the project completion time.

- Worked as lead front-end engineer using React
- Designed an interactive and responsive UI
- Contributed to Rest API development using Express.js
- Built the MongoDB database with the team
- [Sample Video](#) || [Source Code & Contributions](#)

Alimama Smart Restaurant Project:

ASTU java web project, Dec 18, 2022 – Feb 23, 2023,

Alimama is a Java project made by using Servlet and JSP web technologies. Its functionalities are to deliver food and make a reservation at a restaurant. I worked as a backend engineer and project manager while the rest of the team contributed to front-end and database engineering.

- Worked as lead back-end engineer using Java
- Contributed to relational MySQL database development using 14 tables
- [Sample Video](#) || [Source Code & Contribution](#)

Ethio (Alimama) E-commerce Desktop Application:

ASTU Java desktop application project, 2022

A beautiful desktop application made for customers whose want to buy clothes online.

- Developed an e-commerce desktop application using Java Swing
- Contributed to database development using MySQL
- [Sample Video](#) || [Source Code & Contribution](#)

Education

ALX Holberton/ Software Engineering Programme

Feb 14, 2022 - May 31, 2023,

Remote

I am a certified Full Stack Software Engineer who specializes in Back-End Engineering.

Adama Science And Technology University / Computer Science And Engineering (CSE)

July 2020 - July 2025, enrolling

in Adama, Ethiopia

I am studying a broad perspective in both software and hardware engineering topics pertinent to the computing system.
